IN THE SPECIFICATION:

Please replace the paragraph beginning on page 5, line 17 and ending on page 6, line 1 with the following:

--Holding member 32 has threaded projections 66 and 68 at respective ends, while holding member 34 has similar threaded projections 70 and 72. A locking screw 74 is threaded through projections 66 and 70. The locking screw has a nut 75 at its end and compressible means such as spring 76, as well as a wedge 77, between the nut and the abutment formed by the underside of projection 66. The nut 75 is tightened in order to close the two holding members with respect to each other so as to hold the package and leads therebetween. A similar locking screw 79, nut 81 and associated components, are present at the other end.--
